EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Leigh Callander on October 6, 2004.

The application has been amended as follows:

CLAIMS

Claim 2. The phrase "gramnegative bacteria, e.g. Escherichia coli" was deleted and the phrase –gram negative bacteria—was inserted.

SPECIFICATION

The abstract, page 13, was deleted.

The following was inserted as a new abstract:

- - ABSTRACT

[00040] The invention is a method of assessing growth and death rates of micro-organisms within a time period in an environment of interest. Two reporter genes coding for luminescent and/or fluorescent products introduced into the micro-organism produce at least two products which luminesce or fluoresce. They include, either an essentially stable product produced in an essentially known proportion to the total amount of cells of the micro-organism that are or have been alive within a time period, a product present in an essentially known proportion to the amount of cells alive at any moment within the time period, or an essentially stable product produced in an essentially known proportion to the total amount of cells of the micro-organism that have died within the time period. The micro-organism is incubated and luminescence and/or fluorescence is detected after a time period. Finally, the growth and death rates of the micro-organism are assessed. —
